Technical Skills

PHP	Laravel	Mysql	MongoDB	InertiaJs	SOLID
Pusher	Socket	HTML	CSS	JS	jQuery
Bootstrap	VueJS	Redis	Linux	Git	Docker

Education

Faculty of computer and informatics

🎓 Information Systems (2016 - 2020)
Grade: Very Good
Graduation project: Excellent

Professional Experience

BLTech Solutions

Co Founder
📅 Feb 2025 - Present

Microsmart

Technical support
📅 Oct 2024 - Present

Code Link

Full Stack Developer
📅 July 2022 - Jun 2023
Technical Team Leader
📅 Jun 2023 - Feb 2024

Code365

Technical support
📅 May 2025 - Present

TATX SA

Back End Developer
📅 May 2019 - Jun 2021

DASME

Full Stack Developer
📅 Jan 2026 - Present

Contributions

Spatie/eloquent-sortable
I added a modifyQuery parameter for the setNewOrder method which we can customize the query builder of the method against global scopes.
🔗 https://github.com/spatie/eloquent-sortable/pull/167

Spatie/laravel-translatable
I added an ability for filtering a translatable json column with a value depending on either its locale or multiple locales.
🔗 https://github.com/spatie/laravel-translatable/pull/447

Spatie/laravel-query-builder
I created a dynamic filter operator which is used in the query builder so you can write the operator dynamically when searching and this feature adds flexibility to the package.
🔗 https://github.com/spatie/laravel-query-builder/pull/940

Packages

Fatoora ZATCA KSA
This package can help the taxpayers to share their b2b and b2c invoices with the ksa government (zatca portal) and can be integrated with any php platform if native or any framework.
🔗 https://github.com/AbdelrahmanBI/fatoora-zatca

Code Link Booster
This package based on php/laravel can help in implementing many of the repeated features by less coding with high performance, in addition to this will make your project clean, faster and secure.
🔗 https://github.com/AbdelrahmanBI/code-link-booster

Laravel Uploadable
This package can help for uploading a file and save its path in a string field column with additional features like: (overwrite the file when updating & remove the file after deleting).
🔗 https://github.com/AbdelrahmanBI/laravel-uploadable

Projects

Save4 App (https://save4.code-link.com)
This app helps blood banks find compatible and valid blood bags of the same blood type and this will be achieved by creating orders or offers, in addition to the blood banks can chat with each other.

Diet Watchers App (https://crm.diet-watchers.com)
This app can help the customers to gain or lose weight by subscribing to a plan and this plan includes your daily meal that you need, specialists to ask him for advice and finally you can get your daily meals either from the branch or by the delivery.

Noah App (https://no7.app)

This app can help the taxpayers to publish his house furniture products and many users can either buy it by visa card or get a custom product with what he needs.

Siru App (https://siruapp.com)

This app can help the historians to publish the historical articles and landmarks and many users can subscribe to a plan to see the historical articles and landmarks with limitations.

Tatx Delivery App (https://tatx.com)

This app can help the customers to get many services like: fast foods, supermarket's products, call a driver for a journey like uber and etc….

Hermosa App (https://hermosaapp.com)

This app can help the ladies and gentlemen to book an appointment in the beauty center branch and provide a tax accounting system for each branch. In addition, it shares the invoices with zatca (zakat and Income authority in saudi) for the taxable saudi arabians beauty centers.

Top Students App

This app can help the teachers to test their students by creating the exams for the students, then the students answer them and finally the teacher can mark them. In addition, the teachers can show the statistics about their students' level.

Medical App (https://github.com/AbdelrahmanBl/medical-app)

(the graduation project)
This app can help the patients to book an appointment with their preferred doctor, the doctors can either accept or reject the appointment. In addition, the patients can store their reports, rays and prescriptions for protecting and not losing them.
